

# R53SL SERIES

Tied Diaphragm Regulator

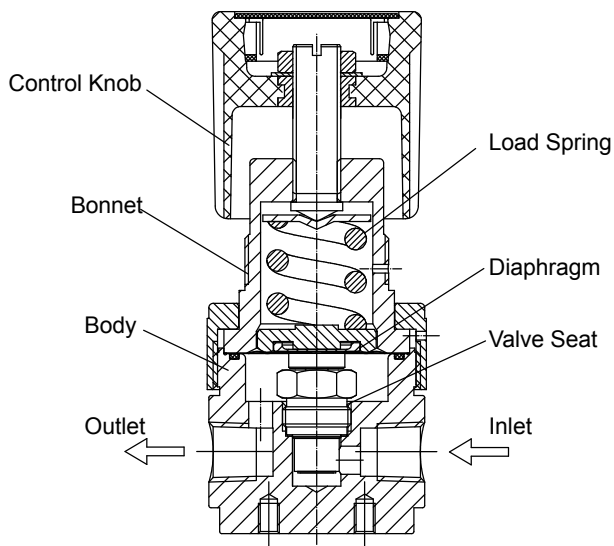

Specialty Gas Equipment

» R53SLGK-DKP-00-00

## Materials

• Body	316L Stainless Steel
• Bonnet	316L Stainless Steel
• Seat	PCTFE
• Valve Stem:	316L Stainless Steel, Hastelloy®
• Diaphragm	316L Stainless Steel, Hastelloy®

GENTEC® R53SL Series Single Stage Tied Diaphragm Regulator consists of a specially designed link between the diaphragm and main valve. It is designed to prevent “creep” if contaminants should form on the valve seat. This feature improves regulator performance and extends the life of the diaphragm. Additionally, a high flow mesh filter is installed before gas enters the seat. It is attached onto the seat. The entire unit can be swapped out during maintenance of the regulator (seat / filter / nozzle).

Debris prior to the seat will be caught by the filter, preventing debris from entering the regulator.

## Product Features

- Single-Stage Configuration
- Metal-to-Metal diaphragm to body seal & dual layer sealing ring
- Integrated waste gas disposal connection for additional safety
- Inlet & Outlet Port Size: 1/4" NPT(F)
- Internal Hastelloy valve trim providing an extra measure of resistance against corrosion (optional)

## Applications

- Semiconductor Industry
- Research Laboratories
- Regulation of Specialty Gases
- Gas Chromatography
- Oil & Gas
- Device Manufacturers

## Specifications

- **Maximum inlet pressure:** 3000 psi (206 bar)
- **Maximum outlet pressure:** 250 psi (17 bar)
- **Safety test pressure:** 1.5 x Maximum inlet pressure
- **Temperature range:** -40 to 165°F (-40 to 74°C)
- **Inboard leakage:**  $2 \times 10^{-8}$  atm.cc/sec He
- **Outboard leakage:**  $2 \times 10^{-8}$  atm.cc/sec He
- **Maximum Cv:** 0.14
- **Weight:** 2.0 lb (0.9 kg)
